

WESTON
BRAIN INSTITUTE

Weston Brain Institute Postdoctoral Scholars at Oxford

Applications are accepted on a rolling basis

Program Information

This program supports top-tier postdoctoral researchers by providing international training to encourage development of the next generation of leading Canadian neuroscientists. Awardees will have postdoctoral positions at Oxford and affiliation with Merton College.

Funding: £57,000 per year (£44,000 per year + benefits) for 2 years

Applicant Eligibility

Applicants must be normally resident in Canada and plan to build their careers in Canada upon completion of their postdoctoral position. Candidates must demonstrate outstanding scientific contributions and have the potential to be competitive for Canadian faculty positions upon return.

Project Eligibility

Projects must be **translational research**, defined by the Institute to be applied research towards developing therapeutics for the prevention and/or treatment of neurodegenerative disease(s) of aging.

Institute definition of neurodegenerative diseases of aging:

- Alzheimer's disease
- Frontotemporal dementia
- Mild cognitive impairment
- Parkinson's disease
- Dementia with Lewy bodies
- Progressive supranuclear palsy
- Multiple system atrophy
- Vascular contributions to the listed diseases
- Prodromes to the listed diseases

Before reaching out to a host supervisor at Oxford, please contact **Matt Sacheli** by email at matthew.sacheli@westonbrain.org or phone at **416-967-7828** to confirm your eligibility and that your proposed project is in scope.
