

NEW GRANT PROGRAM ANNOUNCEMENT

International Fellowships: Canada 2018

A funding opportunity to support Canada's top PhD students to travel to and work in world-renowned labs for up to 12 months, to further their translational research on neurodegenerative diseases of aging. This program aims to support graduate students to build international collaborations, conduct influential neuroscience research abroad, and increase their competitiveness for future positions as leaders in Canadian neuroscience.

Funding: Up to \$60,000 per awardee (prorated as needed, at \$5,000 per month) for up to 12 months.

Applicant must be:

- Registered as a full-time PhD student at a Canadian institution
- A Canadian citizen or Canadian permanent resident

Travel details:

- The Institute is flexible with the travel arrangements required for the program
- Travel can be comprised of one single trip or multiple back-and-forth trips depending on the needs of the research project

Neurodegenerative diseases of aging:

- Alzheimer's disease
- Dementia with Lewy bodies
- Frontotemporal dementia
- Multiple system atrophy
- Parkinson's disease
- Progressive supranuclear palsy
- Vascular contributions to the above
- Prodromes to the above
